EDUCATION

NIGERIAN UNIVERSITY OF TECHNOLOGY AND MANAGEMENT

Nigeria

Bachelor of Science in Computer Science (Undergraduate, Year 2)

2024 – Present

- **Academic Performance:** Cumulative Grade Point Average (CGPA) of 4.57 / 5.00.
- **Core Focus Areas:** Object-Oriented Programming, Data Structures & Algorithms, Software Development Fundamentals, Web Architectures, and Database Design Systems.

DEEPER LIFE HIGH SCHOOL

Nigeria

West African Senior School Certificate (WASSCE)

Graduated 2024

- Graduated with academic honors and distinctions across core science and technical courses.

TECHNICAL EXPERIENCE

FLEXISAF EDUSOFT LIMITED

Remote

Web Development Intern

May 2025 – August 2025

- Engineered production-ready web interfaces for large-scale educational platforms serving active users.
- Architected and implemented modular frontend features and reusable components using semantic HTML5, modern CSS3 (Flexbox, Grid), and foundational JavaScript.
- Applied mobile-first responsive design principles across core application modules to eliminate cross-browser inconsistencies and improve mobile optimization.
- Collaborated actively within an agile project workspace with engineers and product coordinators to execute UI performance improvements.
- Contributed well-structured technical documentation to the internal design code repository.

INDEPENDENT SOFTWARE PROJECTS

Nigeria

Self-Directed Software Developer

2023 – Present

- Designed, built, and tested standalone open-source software applications to experiment with web architectures, frameworks, and database implementations.
- Maintained an active continuous-development cycle across public repositories on GitHub to practice modular code writing, robust version control (Git), and project versioning.
- Transformed raw application wireframes into functional, interactive full-stack and frontend systems.

TECHNICAL PROJECTS

Custom Portfolio Management System & Admin Panel

[Live Link](#)

- Architected and deployed a self-curated portfolio infrastructure featuring an integrated administrative management panel for seamless asset configuration.
- Programmed client-side asynchronous data handling using IndexedDB for permanent storage fallbacks alongside localStorage setups.
- Developed dynamic UI elements including custom filtering states, responsive photo grids, and custom viewer tools.

Beebling (React Web Application)

GitHub Code

- Engineered and deployed a responsive frontend web application built with modern JavaScript and the React ecosystem.
- Applied component-driven development principles to guarantee UI state consistency and maintain fluid element layouts across multiple screen sizes.

JavaFX Reminder & Analytics Dashboard

GitHub Code

- Engineered a desktop-based task configuration and visual analytical dashboard using the Java programming language and JavaFX libraries.
- Applied robust Object-Oriented Design (OOD) patterns to achieve strict decoupling of user interfaces from backend task management algorithms.

Callenda (Calendar & Task Engine)

GitHub Code

- Developed a custom client-side calendar engine focusing on granular date manipulation algorithms and clean custom calendar layout architecture.
- Leveraged native JavaScript DOM manipulation methods to build highly interactive time-interval layouts without reliance on heavy external libraries.

Call Reminder Web Platform (Python & Flask)

GitHub Code

- Built a web application layout designed for custom task timing configurations and scheduling setups.
- Integrated Flask routes with backend data parameters to handle server request-response lifecycles cleanly.

Fakebook Social Engine (Core PHP & MySQL)

GitHub Code

- Programmed an interactive web platform replica to explore user authentication protocols, data session safety, and complex relational schema joins.

TECHNICAL SKILLS & EXPERTISE

Languages:	JavaScript (ES6+), Python, C++, PHP, SQL, Java, HTML5, CSS3
Libraries/Frameworks:	React, Flask, JavaFX, Bootstrap, Tailwind CSS
Tools & Infrastructure:	Git, GitHub, Node.js, npm, Vite, Postman, Relational Databases, IndexedDB
Design & Prototyping:	Figma (UI/UX layouts), Adobe Photoshop, Adobe Illustrator
Core Competencies:	Object-Oriented Programming (OOP), Responsive Web Design, Clean Code Architecture, Documenting Software Systems, Client-Side Data Storage, Calendar/Date Logic

CERTIFICATIONS & DOCUMENTED ACHIEVEMENTS

- **Web Development Internship Certification** – Issued by FlexiSAF Edusoft Limited (August 2025).
- **Graphic Design Internship Certification** – Issued by Wale University (September 2025).
- **Open Source Tracking Milestone** – Developed and maintained public code repositories on GitHub tracking personal software development growth.
